Cyber Trends & Risks in Education - GenAI

Speaker: Damian Grace, Founder and Executive Director, Phriendly Phishing

Date : Thursday 2 May, 3.30pm - 4.30pm

Who is it for? IT teams, principals, Learning & Development staff, educators

and admin/office staff - Cyber security is a whole of organisation responsibilty

Join Phriendly Phishing's Damian Grace (Founder and Executive Director) for a presentation and discussion on the human-related cyber trends and risks to pay attention to in 2024 and beyond. The human factor is still the number one vector of attack with scammers using techniques such as social engineering to trick people.

While the cyber security space can be unpredictable, some trends such as social engineering are mainstays.

GenAI is rapidly building in technology, which has had a huge impact on social engineering, phishing at scale, and impersonation. There is a lot to be aware of and work into your plan.

Themes covered:
- GenAI influence and impact on Social Engineering, Business Email Compromise, and other common Education Sector relevant threats.
- Live examples of these threats and how GenAI influences them in both the context of the workplace (teachers, students, education sector overall, etc) as well as personal life.
- Importance of educating staff and what tools are available to use now.
- Understanding ChatGPT, WormGPT and FraudGPT

About our presenter

Damian Grace, Founder and Executive Director at Phriendly Phishing.

Damian has over 20 years' of experience in cyber security and ethical hacking. He founded Phriendly Phishing after one of my family members was scammed out of $200,000 and his vision continues to be educating and empowering organisations and their people through empathetic and engaging learning.
